DETAILED ACTION

Election/Restrictions

1. Claims 1-3 and 18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 10. Also, claims 6 and 19-21 are withdrawn from further consideration as being drawn to a nonelected species II.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 4-5 and 7-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schmitt in view of Myover.

Schmitt discloses the invention substantially as claimed including deflection elements/brushes 62, a suction zone 12, an opening (see Fig. 1), a suction device 44 and a vacuum box 40. Schmitt does not show a bearing plate and a drive. . However, Myover teaches the use of a bearing plate 19 and a drive 18 for the purpose of displacing the brush member. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Schmitt's device by providing the bearing plate and the drive as taught by Myover in order to obtain highly effective dust collector.

Art Unit: 3724

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nordyke et al., Susnjara et al, Dosier and Scheffer et al. are cited to show related device.
